

Workshop on Learning Governance and Best Practices for Federal Learning Organizations

Thursday, May, 14, 2009

9:00 AM – 5:00 PM

ADL Co-Lab Hub

1901 N. Beauregard St

Suite 600

Alexandria, VA 22311

+1.703.575.2000

Participants will learn ways to:

- Improve alignment and build consensus among learning leaders and operating units to generate a more broadly defined learning charter
- Uncover and manage 'risk' and process gaps that can undermine learning and development efforts
- Establish 'best practices' to improve operating processes, clarify rules of engagement, build agreement on metrics and gain greater investment support
- Leverage common systems, tools, and processes to better serve constituents, avoid program delays and achieve economies of scale

The workshop is designed to help learning practitioners understand and apply fundamental concepts for learning governance. It will be very interactive so participants can develop ideas they can take back to their organizations. The workshop will be facilitated by industry veterans and governance thought leaders, Grant Ricketts and Rob Pannoni. Additional information about the facilitators is available at <http://www.razorlearning.com/about.shtml>. They will also share governance models, 'best practices' and approaches that have been successfully used in other organizations.

Please join us. It will be a great opportunity to network with peers in other agencies.
